

TIMOTHÉE CROUZET

Final-Year Master's-Level Engineering Student

Seeking a 5–6 month Software Engineering Internship in Sydney — March to August 2027

Paris, France — available in Sydney from late February 2027

tim@tcrouzet.com · +33 6 51 87 76 82

Eligible for Australia's Working Holiday visa (subclass 417) — no employer sponsorship required

SUMMARY

From AI theory to production software in one internship at Dust (French AI startup, US\$40M Series B): built MCP integrations, OAuth connection flows and sandbox security in TypeScript/Node.js, with tools now live for customers. Now seeking a Sydney internship — completing the degree's mandatory semester abroad under a school-issued internship agreement.

EXPERIENCE

Software Engineer Intern — Dust

Paris · May–August 2026

17+ merged pull requests in Dust's open-source monorepo: github.com/dust-tt/dust

- Worked on enabling agents to run code in shared E2B sandboxes; built the authorisation layer that limits execution to workspace members
- Built and shipped an MCP server for Exa (people & company search) — now live in production
- DRI (end-to-end owner) of the Workday MCP integration: built the MCP server and its connection via Dust's internal OAuth provider
- Extended the Gmail, Outlook and GitHub MCP servers with new tools
- Resolved customer-reported production bugs (Slack, Gmail integrations) on the support rotation

SmartRoute — MTB Route Planner (Web App)

ESIEE Paris · 2025 Year-End Engineering Project

- Led a five-student team building a web-based mountain-bike route planner using Strava and OpenStreetMap data
- Built the data pipeline scoring OSM route segments by Strava-heatmap popularity, feeding weighted Dijkstra route computation
- Parsed natural-language route requests into structured constraints (distance, difficulty...)

EDUCATION

ESIEE Paris — Gustave Eiffel University

2024–2027 (expected)

Diplôme d'Ingénieur in Data Science & AI — Master's-level engineering degree.

Classe Préparatoire (CPGE) — Lycée Janson de Sailly, Paris

2022–2024

Selective two-year program with a specialization in mathematics and physics, preparing for competitive entrance exams to top French engineering schools.

TECHNICAL SKILLS

Software Engineering — TypeScript/Node.js, React/Next.js, REST APIs, OAuth, Git/GitHub, PostgreSQL, Docker, MCP, RAG.

Python & Machine Learning — Python, NumPy, pandas, scikit-learn, XGBoost, Matplotlib, feature engineering, model validation.

LANGUAGES

English — Fluent (TOEIC 955/990, CEFR C1) · French — Native · Spanish — Working knowledge

INTERESTS

Tennis (team captain, interclub) · Football (organised tournaments) · Skiing (raced ages 12–16)
